Spectrum's Corner

Thought of the Day

Everything happens for a reason, learn from it and move on, don't be bitter about what happened, be happy about what will.

Word of the Day

Misprision: The deliberate concealment of one's knowledge of a treasonable act or a felony.

Usage:- You were guilty of misprision of treason in not revealing it

USEFUL COMPUTER TIPS AND TRICKS

WRITTEN AND DESIGNED BY PRIYANSHU SINGH

• USE PENDRIVE AS TEMPORARY RAM-

1. Insert your blank USB drive and go to "My Computer" and right click on your USB drive, then go to properties.
2. Next click on the "ReadyBoost" tab, and Choose the option that says "Use this device".
3. Select the space slider and set it to maximum.
4. Save everything and Restart your computer, and you're done!

Warning - DO NOT UNPLUG THE USB DRIVE WHILE IN USE. THIS CAN RESULT IN PERMANENT DAMAGE TO YOUR SYSTEM.

• Convert a webpage into a PDF-

1. Open any browser and go to your favourite website that you want to convert.
2. Press Ctrl+P to open the print Dialog box and change the destination to "Save as PDF" and you're done!

• Shutdown Your PC with a timer-

1. Press Win+R and type "cmd" (without Quotations) and hit enter.
2. Next type this command in the terminal window "shutdown -s -t 1000" (without Quotations) and hit Enter.

Your computer will shutdown automatically after 1000 Seconds.

Note: 1000 is the time in Seconds.

• Take God Level control of your Computer-

1. Create a New Folder.
2. Rename it with this "GodMode.{ED7BA470-8E54-465E-825C-99712043E01C}" (without Quotations) and hit Enter.

• Free up System Memory and Boost your Computer speed-

1. Press Win+R and type %temp% and hit ENTER.
2. Select all the files by pressing Ctrl+A
3. Now press shift+del

This will delete all the temporary and unuseful files.

• For the bonus trick Scan this QR code-

DID YOU KNOW?

The 1969 Apollo 11 Mission rocket which had Apollo Guidance computer had only a 4KB RAM and 32KB Hard Disk!
